## Aluminium Furniture

Aluminium is a strong yet light material that does not corrode or rust making it ideal for outdoor furniture that benefits from being easily moved in use.

Our aluminium furniture is pre-washed, etch primed and electrostatically powder coated for an optimum, even cover before being baked in an oven to fix the finish. This process prevents oxidation and gives an attractive, hard wearing surface and the possibility to offer varied colour themes.

## Care

### **Aluminium Cleaner – 4AC**

Aluminium may be washed with soapy water or treated with our Powder Coated Aluminium Cleaner, supplied with an application pad.
